

Quality Station Controller

QSC-A

This new device makes possible connecting as many JBC Stations^{1,2} as desired to JBC Smart Fume Extractors, through the USB interface (USB A-B cables required).

The software inside the QSC makes easy configuring which of the two fume extractor ports will be opened when picking up any tool from its stand.

You can **configure the FAE directly on the QSC** (requires a HDMI connected to a screen, a keyboard and a mouse) **or from any computer** in the same LAN as the QSC (connected by Wifi or Ethernet) by tipping the address in a Web Browser.

¹ JBC stations featuring USB connectors are supported except for JT-D, TE-D and older hot air stations. PHB/PHS preheaters and older are not supported. ² Fume extraction on the stand is limited to 8 tools with FAE2 and 4 tools with FAE1.

Specifications

Net weight	0,24 kg (0.53lb)
Dimensions	0.00 in)
Input Voltage	5V dc
Max. input current	3A
Package weight	710 gr (1.57 lb)
Package dimensions	385 x 165 x 85 mm (15.16 x 6.50 x 3.35 in)
	240 gr (0.53 lb)
