Nano Handle

NT105-A

The JBC smallest handle for soldering very small-sized components requiring the **greatest precision** such as chips 0402, 0201, 01005, etc.

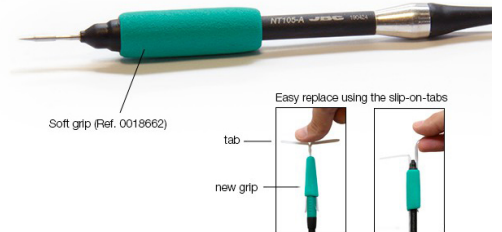

Shortest distance Tip-to-Grip Provides greater manual control of the tool, including when using a microscope.

Soft grip The grip offer a soft and comfortable feel and prevent the fingers from sliding down.

Works with NASE and NANE Nano stations and C105 cartridges.

Easy grip replacement Using the fitters you can easily change the damaged grips (Ref. 0018662).

Supplied without cartridges. Not compatible with C115 range.
