

# Everything you need in minimum footprint

# **Compact** line

Everything you need in minimum footprint

## Soldering

### CDS

Precision Soldering Station

This station is ideal when working on populated PCBs or under a magnifying glass. It includes **T210** Precision Purpose Handle.

### CDB Soldering Station

This station is suitable for both SMD or THT components. It includes **T245** General Purpose Handle.

#### CDA Solder Feed Station

The perfect station for applications requiring a free hand to solder wire, connectors, transformers or THT components. It includes **AP250** Solder Feed Iron.

## Rework

#### CDP

Micro Tweezers Soldering Station

The best solution for soldering and rework of SMD such as chips, small/ medium SOP components and dual line components. It includes **AM120** Adjustable Micro Tweezers.

### CDD

Desoldering Station

The perfect station for precision desoldering jobs of THT components and SMD pad cleaning. It includes **DS360** Micro Desoldering Iron.

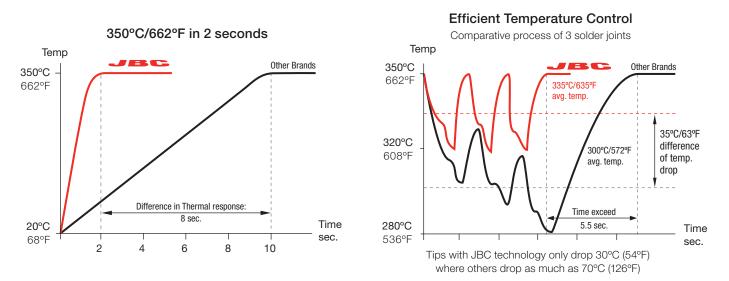

# The Most Efficient soldering system

# The JBC Exclusive Heating System

JBC's stations work with the JBC Exclusive Heating System which recovers tip temperature extremely quickly. This increases work efficiency and allows the user to work with lower temperatures.

## The Intelligent Heat Management

Thanks to automatic detection of the tool in the stand, JBC Soldering and Rework Stations allow the tools to enter into **Sleep & Hibernation Modes** when not being used. As a result, tip life lasts up to 5 times longer.

## Sleep Mode

**Sleep Mode** automatically lowers tip temperature below solder melting point when the tool rests in the stand.

It prevents the dissolution of the tip iron coating into molten solder.

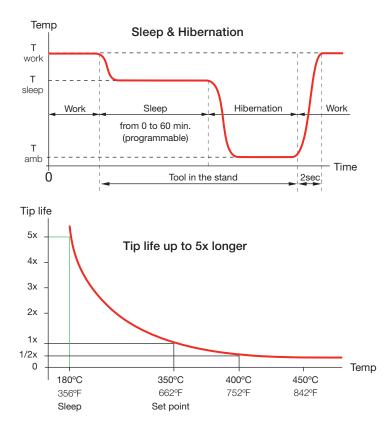

## **Hibernation Mode**

After a configurable period of tool inactivity in the stand, the tool enters into **Hibernation Mode.** 

It cuts off the power supply making the tip reach room temperature thus preventing oxidation and saving energy.

## Longer Tip life

Tip life increases exponentially by using lower temperatures as shown. Using the Sleep Mode, the temperature is further reduced, which extends tip life by 5.
